CYBERSECURITY ENGINEER | SOFTWARE DEVELOPER | IT OPERATIONS

Information Technology Professional with over 5 years of combined experience in Programming and Consulting for technical companies. Implemented remediation plan in response to an attempted cybersecurity breach, including hardening Google/Microsoft environments. Performed a wide range of secure coding projects utilizing HTML, CSS, JavaScript, Ruby, Python and APIs. Skilled problem-solver with a fast learning curve for cutting-edge technologies.

CERTIFICATIONS

CompTIA Security+

July 2023

TECHNICAL PROJECTS

Keylogger - [Github](#) | [Demo](#)

Listens to keyboard events and logs them into a file called "keylog.txt".

- Implemented the pynput library to interpret user keystrokes
- Prevented the command from automatically aborting when the user logs out or exits the shell

String Encryption - [Github](#) | [Demo](#) | **Folder/File Encryption** - [Github](#) | [Demo](#)

Performs encryption and decryption, utilizing folders, files or user string input.

- Accomplished symmetric string encryption using the Fernet scheme
- Derived a key from a password using the Script algorithm

Soup Scrape Game (GUI) - [Github](#) | [Demo](#) | **Soup Scrape Game (CLI)** - [Github](#) | [Demo](#)

The player will have four chances to guess who said the quote. After every wrong guess, they'll get a hint about the author.

- Scraped 'http://quotes.toscrape.com' for a collection of quotes and auto created/saved information to a .csv file
- Refactored code allowing for Tkinter-based GUI

PROFESSIONAL EXPERIENCE

Web Developer/IT Manager | Skytop Strategies, New York, NY

February 2022 – March 2023

- Implemented remediation plan in response to an attempted cybersecurity breach
- Managed the daily business intelligence and media platform viewed globally in over 140 countries/2500 cities
- Leveraged WordPress API with React to preserve a headless Content Management System
- Maintained a database of 1M records through weekly cleansing, enrichment and validation
- Warmed an IP/domain, progressively allowing users to send 500K+ emails per day

Junior Software Engineer Intern | Meetopolis, Remote

December 2021 – March 2022

- Developed profile page for production using Node/Express, JavaScript/React/Redux and CSS/SCSS
- Contributed to discussions on features and completed tasks assigned via the Scrum Master

Steam System Technician/Project Engineer | Mosto Technologies, New York, NY

August 2015 – December 2021

- Utilized Modbus, BACnet, and LonWorks communications protocols to successfully integrate 100+ monitoring platforms into building management systems
- Used the CLI to navigate firewalls and assisted IT departments in commercial building security measures

EDUCATION

Cybersecurity Engineering, Flatiron School, Remote
